Easy ventilation, Advanced technology

The Sirio S2/T, a project started in 1979 and a user-friendly equipment that combines excellent flexibility and advanced technology.

It has been expressly conceived for patient's breathing assistance in emergency healthcare during transport. Compact and light, it is equipped with a long lasting internal battery granting the maximum flexibility of use.

Versatility:

Sirio S2/T offers a wide range of therapeutic options; it is able to ensure a controlled volume ventilation limited by pressure in invasive and non-invasive modality, meeting the breathing requirements of adult, paediatric and neonatal patients (weight > 3 kg).

Simplicity:

The user-friendly interface, cleverly designed to facilitate emergency health operators, makes of this ventilator the ideal choice for use on ambulance, helicopter and airplanes.

Performances:

Sirio S2/T guarantees excellent performances thanks to the technological advantages granted by Siare. It is equipped with several ventilation modes: CPAP - PSV (Apnoea Back-up) - IPPV+AST - MANUAL - PEEP - Pressure Trigger - FiO₂ adjustable at 50% or 100%. Long lasting internal battery and a series of optional accessories designed for a good portability of the device.

Sirio S2/T Professionalism in Emergency

Version for transport with professional bag for ventilator and 2 lt cylinder housing, complete with support for rapid connection/disconnection for installation in ambulance.

Version for transport with professional stainless-steel tubular support for ventilator and 2/3 lt cylinder housing, with possibility to attach a quick connection plate for installation in ambulance. Certified according to EN 1789 Directive.

The Sirio S2/T is the ideal solution for patient transport.

The Sirio S2/T is homologated for use in helicopter.
